Christian BOSSE

Seeking a position in AI | Machine Learning Engineering & Data Science

Île-de-France, France | **+33 7 67 79 80 06** | **christianbosse123@gmail.com** | **www.linkedin.com/in/christian-bosse-6104a9332** | **github.com/ChristianBOSSE361** | **christianbosse361.github.io/Portofolio**

Profile

Recently graduated from Grenoble INP - Ensimag as a Computer Science and Applied Mathematics Engineer, holding a Master's in Artificial Intelligence. Passionate about problem-solving, mathematics and technology, I am looking for my first position as an AI/ML Engineer & Data Scientist to leverage my skills and contribute to high-impact projects.

Work Experience

AI Pentesting Research Engineer Intern *April 2026 – September 2026*
(Group) Astek Île-de-France, France
Design and development of an autonomous AI pentesting agent using Reinforcement Learning in a Gymnasium environment, including a monitoring dashboard, a multi-algorithm evaluation pipeline, and Docker containerization for deployment on a shared server.

NLP/ASR Research Engineer Intern *February 2026 – April 2026*
Grenoble Computer Science Laboratory (LIG) Grenoble, France
Evaluation of the WhisperX ASR model's performance on transcription of various French accents using multiple metrics, and implementation of a transcription fusion algorithm.

Data Engineer Intern *June 2023 – August 2023*
Orange Côte d'Ivoire Abidjan, Ivory Coast
Analysis of a specific portion of the database infrastructure to address various business challenges and extract actionable insights.

Education

Engineering Degree in Computer Science — *Grenoble INP - Ensimag* *2023 – 2026*
Master of Artificial Intelligence — *Grenoble INP - Ensimag & UGA* *2025 – 2026*
Bachelor of Science in Computer Science — *Grenoble INP - Ensimag* *2023 – 2024*
Scientific Preparatory Classes (CPGE) — *Lycée Français Blaise Pascal d'Abidjan* *2021 – 2023*
Scientific Baccalaureate — *Lycée Scientifique de Yamoussoukro* *2020 – 2021*

Skills

Programming Languages	Python, Java, C++, C, SQL, Bash, CUDA, R
ML / AI / Data	PyTorch, Scikit-learn, NLP, Speech Recognition, Computer Vision, Generative AI, RAG, LangChain, Supervised & Unsupervised Learning, Reinforcement Learning, Spark
DevOps / Tools	Git, GitLab, GitHub, CI/CD, Docker, Linux (Bash), Windows, HTML, JavaScript, CSS
Languages	French (Native), English (B2), Spanish (Beginner).

Projects

Portfolio Project *2026*
Development and deployment of a personal portfolio website integrating a RAG chatbot (Onyx) capable of answering questions about my background and experience, backed by a vector store and exposed via a REST API.
Technologies: Python, LangChain, ChromaDB, FastAPI, Render, HTML, CSS, JavaScript

Personal Artificial Intelligence Projects *2025*
Several AI mini-projects completed over the summer: classification, detection, denoising, text generation, etc. Code available on GitHub, with some mini-projects still being improved.
Technologies: Python, PyTorch, Scikit-learn, NumPy, Pandas, Matplotlib

Algorithms Project *Ensimag 2nd Year 2025*
Built an AI using algorithms such as Min-Max and Alpha-Beta pruning, capable of competitive play in the Blobwar game.
Technologies: C++, OpenCV

Database Project *Ensimag 2nd Year 2024*
Designed and implemented a database from a requirements specification to address client business needs.
Technologies: Oracle, SQL

Hobbies
